

**VOTE C.C.F. JUNE 10th**  
**STUART McRAE**  
**Candidate**

Since 1945 net profits of corporations increased by \$1,203,000,000—192%, but average workers wages increased by little over half as much—106%.

In 1949 processors and middlemen got 49c. of every consumer dollar spent on food. In June 1965 they got 64c. In 1949 the farmer got 51c. of the food dollar. By 1965 his share had been cut to 46c.

The stockholder who makes profits on the stock exchange pays no tax in Canada. The President of Trans-Canada Pipe Lines would pocket 797,500 tax free dollars if he chose to sell his 55,000 shares, for which he paid \$8, at the present market price of \$24.50. Worse still tax concessions are granted those with dividend income to the extent that a person may enjoy \$11,000 of such income and pay only the \$60 security tax. If a married man with one child earns \$11,000, he would pay \$1,798 Income Tax.

We of the C.C.F. say this is wrong. We believe that the primary producer, the wage earner, the small business man are entitled to a share of the wealth that at the present time bulges the pockets of the profiteer. If you agree vote C.C.F.

## Funny and Otherwise

Old Ben had farmed his 350 acres for fifty years and now he had finally sold out. The handsome little companion and handied Ben and his wife the bill of sale.

"Well, well," he said, "I guess you're all ready to start that trip you've been talking about so long. I sure do envy you fellows. Where you going first?"

"Been stretched comfortably and knocked the sand out of his pipe, 'Parson' has been hard work," he said, "and I'm going to the first place I can get out of. We aim to find one of them tourist places in the mountains. The first week I'm just gonna set in to be first class in a reclining chair. And the second week I'm gonna start to rub."

Meeting across a very dirty stretch of country, the attorney stopped before a run-down gasoline station. A single dejected-looking attendant stood beside the gas pump, doing nothing and not enjoying it.

The motorist looked out of the window of his car and said, "Hey! What do you call that doggone, dried-up, broken-down, half-baked fellow?"

"That's near enough," he said.

"Two very cute nurses, sleeping in here, and two interns, 'Nash, we're coming in after hours.'"

"Two interns: 'That's okay, we're going out after ours.'"

The very small boy came home dejected from his first day at school. "Ain't got no teachers," he said.

"Why not, dear?" his mother asked.

"Well, I can't read and I can't write, and his teacher won't let me talk, so what's the use of going."

Heifer was forever pestering his father with embarrassing questions until finally the disgraced parent told him that curiosity once killed the cat.

Heifer's eyes opened wide in alarm and he was quaking for a second or two.

However, his parent's silence was short-lived, when Hector quickly popped out with, "What did the cat want to know?"

## Winkler ACT show hits province high, talent good

Winkler's ACTB Search for Talent Show has upheld its excellent reputation of again raising the largest amount of money of the year in the province in the fight against tuberculosis.

In the face of competition of a hockey game in which their club was vying for and won the Manitoba Intermediate "A" Championship on the same night before a crowd of 1,500, the ACT-COBB show drew 700 persons and raised over \$15,000 by the time the show was over, with telephone votes expected to be in excess of \$200.00, yet to come.

The 14 contestants and their sponsors did a thorough job.

(The Progress, Winkler, Man.—March 13, 1937)

## QUACKS

Despite the abundance of health information available to the public, there are still people who allow themselves to be deceived by "quacks," unqualified people who may be for sale alleged to cure such ailments as cancer, diabetes, or heart disease. It is against the law in Canada for anyone to use the word "cure" in advertising, on labels or containers of any medicine, or in any other manner, to claim extravagant results for their product. It is also against the law for any of the serious diseases such as cancer, the patient should see a medical doctor, not buy some substance offered for sale as a cure.

DRIVE CAREFULLY

## Big electric shovel moved to coal pit for spring and summer work

Four Caterpillar graders, plus five crews from the Calgary Power and Telephone companies were busy yesterday morning, Wednesday, moving the 300-B four cubic yard electric shovel from the Upper yard of Alberta Coal Shale Ltd. to the coal pit near the river.

The big electric shovel, which weighs 130 tons, was brought out on a rail from Coal Valley, 200 miles west of Edmonton, and has been completely overhauled and repaired during the winter. It is the only one of its kind in the province.

The Municipal District of Taber supplied the four caterpillar tract-

## Reserve in Canada

Far and away the largest quantity of oil in reserve lies in the Middle East. For this reason, the oil companies of the west and the governments of the west, are not so much interested in the oil fields in Canada's northwest as they are in the Middle East.

Improved with age Many employers have found that older persons have special skills to offer, backed by training and long experience. These people are not so prone to casual absenteeism, and except where heavy manual labor is involved, they compete well with younger workers.

The Sun telephone book was printed 70 years ago.

# Future Stanley Cup Contenders

Sound hockey tactics are taught in Canada's multitude of organized leagues, often by coaches with professional experience. Hockey begins early in the lives of Canadian boys, and every town and hamlet has a league, usually supervised by Service Club, Civic or Church organization. While the value of fresh air and exercise is recognized, the building of character is the number one aim.

The average Canadian boy learns to play hockey at the age of six or seven and, in many cities, he can join an organized league when he is nine. A vigorous sport, well played hockey is a game of skill and intelligence.

The average Canadian boy learns to play hockey at the age of six or seven and, in many cities, he can join an organized league when he is nine. A vigorous sport, well played hockey is a game of skill and intelligence.

TAKE SPECIAL COURSE—About a hundred youths, mainly from rural communities on the Prairies have shown interest in a special course in hockey being offered at this time the training is regular with the aim that wherever they might have little to do on the farm at the season they get full pay and allowance and qualify as a trained player before returning to their homes and pursue their normal active life. Here, getting a few pointers from a diagram are Achille and Alvin Buehler of St. Boniface and Graydon, Man.

Hockey is so much part of Canadian life that it has also become a part of the national heritage. National Hockey League President Clarence Campbell smiles beside the symbol of World hockey supremacy, the Stanley Cup. The 61-year-old trophy has become one of the most famous objects in the international sports world.

# Canadian Week Features

## The Weeklies say

(The Independent, Regina, Sask., Feb. 15, 1937)

### BROTHERHOOD

We are selecting the best from all the cultures brought to our shores and blending them into a useful, peaceful and comfortable way of life. This process will continue to enrich all of us if we continue to regard all Canadians as brothers under the law which governs us. That is brotherhood—for peace and freedom.—Lachrie, Que., Wainman.

### UNKNOWN REASONS

Immigration boards hardly ever give their reasons for deportation orders. . . . Presumably "it was not in the public interest." That sounds a lot of like, pretty and great. It would be gratifying to have the reasons made public. In the long run, it is a much more satisfactory way of doing things.—Gardner, Prince, Alta., Herald-Tribune.

### LASTING LIGHT

Mr. R. B. Coulter, Coleville, Informs The Banner that he has been used continuously for 24 years. The bulb, which is made of light, was put into the socket in 1913. Quite a record for a light bulb.—Ottawa, Ont., Banner.

### JOINT EFFORT

If civilization, which has given us the highest standard of living the world has ever known, is to survive, labor and management will have to take their full measure of responsibility. It can be done through the process of democracy.—Blair, Sask., Journal.

### AVAILING PROPHET

So a few and hard look at the (sheep) problem needs to be taken. A brand new approach and solution brought forward. . . . The new approach will come late, when the pressure gets strong enough, but the man who serves up a new answer will be regarded in this western country.—Fairview, Alta., Post.

### TOUGH OUTLIER

Blocked roads in winter time is one of the important steps in the cycle which is moving more farmers from their farms to urban centres, and generally reducing the farming population to the point of being serious. —Melfort, Sask., Journal.

### Bed-ridden get

Wolsley getting home now will give priority to the bed-ridden aged under a new policy just announced by the provincial ministry of social welfare and rehabilitation.

Up to now these homes, at Wolsley, Melfort, Saskatchewan and the new ones soon to be opened in Regina, have been earmarked for aged people. The reason for the change is the large number of senior citizens being built by non-profit organizations with government assistance, coupled with the fact the government considers it a proper respect for nursing care of the aged.

According to present plans they will be moved because of the new policy. The new homes will be under a system giving the highest priority to those needing continuous care on an urgent basis.—The News, Indian Head, Sask.

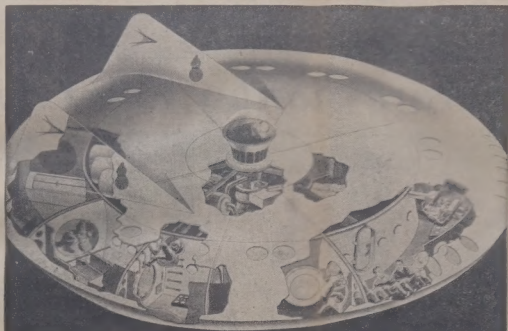

### Yorkton purchases

walk snowblower  
The city of Yorkton has purchased a new Buick snowblower and a Ferguson 35 tractor for clearing the sidewalks of snow, reports The Yorkton Enterprise. The tractor will also be used in the summer for other city work.

The snowblower is said to clear a four-foot four-inch width and under ordinary conditions moves along at about three miles per hour. The blower can be swung 200 degrees and the snow blown 75 feet if necessary, or crowded down to strip six or seven feet.—The Times, Kamour, Sask., March 26, 1937.

### BUILDING PERMITS TOTAL

\$45,765 DURING MARCH  
Twenty-seven building permits valued at \$45,765 were issued by the City of St. James during March. The total issued the building department for the month was the first three months of 1937.—The St. James, March 24, 1937.

**THE AIRSHIP OF THE FUTURE** takes on the flying Saucer look. Lovell Lawrence, an automobile engineer speaking in Detroit recently said that is what a flying saucer of the future may look like from an engineering viewpoint. He said the ship is designed to fly about 25,000 miles per hour and would be 50 feet in diameter. It would contain an atomic reactor for power or else use burning, high energy gas. The ship could climb slowly and create a gravitation pull within the saucer. A rise of 4,000,000 miles to Mars would require only 15 weeks without refueling.

**HE GETS A CHANCE TO LIVE**—The campaign to raise the necessary \$1,000 for mending 16-month-old Johnny Slattery of Montreal to Minneapolis for a delicate heart operation has attained its objective. An anonymous \$500 cheque was received recently bringing the total to \$1,000. The money will be used to send the "boy" to the U.S. where a doctor believes he can save Johnny's life. The child suffers from a septal defect—a rare heart condition for which the only cure is an operation requiring special techniques and equipment available only in Minneapolis. Said Tom Slattery, the infant's father: "I don't know what is aye, I'm overwhelmed. I never realized before that people could be so good."

(The Recorder, Boston, Mass.—March 21, 1937)

**KESTON'S MAIN STREET 1917**—There are some who think that the spring thaw has played havoc with Keston's Main street. There is no evidence of such a water in the above picture taken back in 1917 but the street left much to be desired. On the left is St. John's Anglican church and rectory, and the first building on the right is the Baptist church, which was demolished several years ago. The U.G.C. elevator is in the background and some other buildings presently standing are in the foreground.

**THREE DECADES OF AMOR**  
"ANDY"—Freeman Gordon, top, and Charles Carroll, bottom, known to the entertainment world as Andy and Andy, who have begun their 30th year of continuous broadcasting. Gordon is Amos and Carroll is Andy.

## RED CROSS WATER SAFETY

**SAFETY SAM SAYS!**  
REMEMBER BOYS AND GIRLS, FLOOD WATERS THIS YEAR HAVE CHANGED MOST SHORES—LINES ON LAKES AND RIVERS—BUT MIGHT NOT BE THERE IT WAS LAST YEAR.

Every taxpayer entitled to graded roadway—Wightman

"Every taxpayer is entitled to a properly graded roadway," said Alderman R. F. Wightman, former mayor, during a hour discussion of grading and graveling problems at Thursday night's meeting of St. James city council.—The Leader, St. James, Man.

**TAKE SPECIAL COURSE**—About a hundred youths, mainly from rural communities on the Prairies have almost finished a two-month special army militia course at Winnipeg. Offered each year at this time the training is popular with the men who otherwise might have little to do on the farm at this season. They get full pay and allowances and qualify as a trained soldier before returning to their homes and perhaps part-time militia activity. Here John Beaudin of Marieval, Sask., poses with his rifle. —Canadian Army photo.

**BEAUTY AND THE BLOWDOWN**—The annual display of blossoms in the Niagara peninsula will soon get under way if appearance of apricot and peach blossoms are any indication. Here, Josephine Perreault admires some of the blossom, about blossoms on a tree in St. Catharines, Ont. In about two weeks the entire district near and around the Niagara river will be filled with spectators to witness the annual spectacle of flowering fruit trees laden with blossoms.

**TAKE SPECIAL COURSE**—About a hundred youths, mainly from rural communities on the Prairies have almost finished a two-month special army militia course at Winnipeg. Offered each year at this time the training is popular with the men who otherwise might have little to do on the farm at this season. They get full pay and allowances and qualify as a trained soldier before returning to their homes and perhaps part-time militia activity. Here are Lloyd Elkhart, left, and Gerry Gardner of Quill Lake, Sask., checking over a good target on the rifle range. —Canadian Army photo.

NO OH! KONG TAI poses with his two brothers Khek Gack Hong, left, and Tan Hiew Eng, following a "family" wedding in Singapore, Malaysia, and said that after seeing the girls for more than a year he was still unable to make up his mind which he should take for a wife, since the girls were agreeable to share their husband, and Singapore law permits polygamy, he decided to marry both.

(The Comet, Lashburn, Sask.—March 7, 1957)

## Green light given to build seed cleaning plant

At a meeting of prospective shareholders held in the Community Hall at Lashburn on Tuesday, March 26, the green light was given to go ahead with formation of a co-operative association to construct and operate a seed cleaning plant at Lashburn. The meeting was attended by about 100 interested farmers coming from districts in the area concerned with the plant to be sited on the west side of the town to the west to Lashburn on the east.

In the report of the committee to the meeting, it was stated that the project, which was given the go-ahead by the chairman, Chas. "Doc" Smith, was reported that a total of \$30,000 of share capital had been pledged with some districts still to be contacted.

On the basis of the report, and on the advice of Mr. J. K. Jackson, president of the Lashburn Seed Cleaning Co-operative Association, the meeting to give information regarding the seed cleaning plant was held. It was decided that a minimum of \$30,000 is to be raised to build the plant. The construction was started. The provisional board of directors was:

The meeting was held in the Community Hall at Lashburn on Tuesday, March 26, the green light was given to go ahead with formation of a co-operative association to construct and operate a seed cleaning plant at Lashburn. ## B.C. Electric starts on natural gas plans

Plan for distribution of natural gas in Surrey Municipality will be outlined to Surrey Municipal Council at next Monday's meeting. With entry of the April 21 deadline for municipal action on natural gas distribution, the B.C. Electric's certificate for distribution becomes valid in this municipality.

To be bound out with the Municipal Council are the location of distribution lines, conditions governing digging up of roads, approval of plans.

Of special interest will be the target date when the utility company can give natural gas to consumers in Surrey. With construction programs already underway in other districts of the Fraser Valley it is not known at present just how long Surrey households will have to wait for natural gas. The Surrey Leader, Victoria, B.C.—April 4, 1957.

## BRING THEM IN

It's all up with those new taxes that have been imposed on tobacco, liquor, and other goods. The Lashburn Seed Cleaning Co-operative Assn. Ltd. is now in a position to make a large number of new citizens in the province ahead—Campbellton, N.B. Times.

## Welcome news

(The Herald Tribune, Grande Prairie, Alta.)

Among the most welcome news stories of this year is the one which reports that 1957 will be a banner year for Canadian immigration. On the heels of discovering that the population exceeded predictions in its growth over the past five years, it is more than refreshing to hear that our greatest need—that for more people—is being filled.

It would be even more pleasant if we could report that this influx of people was a result of action by our government. Unfortunately this isn't the case.

There are two basic causes for the anticipated increase in immigration. One is the fact that, which brought to Britain increased prosperity. This prosperity brought many Britons to the decision that it would be wise to emigrate to Canada, where emigration is only a word.

Second cause was the uprising in Hungary. A large proportion of this year's immigrants are Hungarians who left their native land when it appeared that resistance was futile against overwhelming numbers of Russian troops.

There's a further fact that should be welcome news for Canada. It's that the bulk of the prospective immigrants are people who are young, energetic, and have the ability to make a new life in a growing nation, are the very ones we need. Because, with them, the new portions of Canada now being developed can be opened.

### ACADIA C.C.F. NOMINATES STUART McRAE

(By E. E. BROWN)

An enthusiastic and crowded convention nominated Stuart McRae as C.C.F. candidate for the coming federal election.

Mr. McRae is a very busy young man. He is a member of the Board of the Delta School Division, and President of the local Rural Electrification Association. A member of the Farmers' Union and various cooperative movements. Stuart has been active in many of the many projects of the C.C.F. in the past.

### Egg Production in Britain

Britain's hard-working hens are making new head-aches for the U.K. economy. Egg production in the U.K. in 1936, with more than 10 billion eggs, has reached its peak. The price of eggs in 1937 promises to be very high.

What to do with the egg surplus, and how to pay for it in terms of production, is a problem which the British Government is now facing. The government is now facing the problem of how to pay for the egg surplus, and how to pay for it in terms of production.
